1. Highlights of 2024

1.1 Summary of major activities

- a) In the year 2024, Indian Computer Emergency Response Team (CERT-In) handled 20,41,360 incidents. The type of incidents handled were Website Intrusion & Malware Propagation, Malicious Code, Phishing, Distributed Denial of Service attacks, Website Defacements, Unauthorized Network Scanning/Probing activities, Ransomware attacks, Data Breach and Vulnerable Services. Remedial measures for handling incidents were suggested and implemented in coordination with relevant stakeholders.
- b) CERT-In tracks latest cyber threats and vulnerabilities. A total of 959 security alerts, 72 advisories and 360 Vulnerability Notes were issued during the year 2024.
- c) CERT-In conducted 23 cyber security training and awareness programs for Government, Public, Critical Sector organisations to educate them in the area of Cyber Security with the latest security threats, needs and developments & deployment of techniques and tools in order to minimize security risk.
- d) CERT-In conducted 18 domestic cyber crisis exercises in 2024 for various organizations across Sectors and State Government Departments.
- e) CERT-In has contributed in planning & scenario development in 2 exercise and participated as a player in 3 International cyber security drills in 2024.
- f) CERT-In contributed and participated in the APCERT Annual Cyber Drill 2024 held on 29th August 2024.
- g) CERT-In contributed & participated in the first BRICS Cyber Drill held in Kazan, Russia from 16th to 9th September 2024.
- h) CERT-In participated in the ACID Drill & TTX on 15th & 16th October 2024.

- i) CERT-In participated in the 4th edition of AFRICA CERT Cyber Drill on 29th November 2024.

1.2 Achievements & milestones

- a) CERT-In contributed and participated in the APCERT Annual Cyber Drill 2024 held on 29th August 2024 and played three different roles namely as Exercise Controller (EXCON), as a Player and as an Observer for international CERTs in the Drill.
- b) CERT-In has published Technical Guidelines on Software Bill of Materials (SBOM). This technical SBOM guidelines has been issued for entities, particularly those in the public sector, government, essential services, organizations involved in software export and software services industry in order to improve security, compliance, risk management, supply chain transparency, quality assurance, interoperability, and vendor management in their software development and procurement processes.
- c) CERT-In became India's first Cyber Forensic Lab to get notified as Examiner of Electronic Evidence within India, with the following scope:
 - i. Computer (Media) Forensics including Drone Storage Media (excluding Floppy Disk Drive)
 - ii. Mobile Devices Forensics
 - iii. CCTV Forensics Media Recovery (excluding Video Authentication and Enhancement)
 - iv. Cloud Forensics (from premises of Cyber Forensic Laboratory, CERT-In)

2. About CERT-In

2.1 Introduction

- a) CERT-In is a Government organisation under Ministry of Electronics and Information Technology (MeitY), Government of India established with the objective of securing Indian cyber space. CERT-In provides Incident Prevention and Response services as well as Security Quality Management Services.
- b) CERT-In has been designated to serve as national agency for incident response under Section 70B of the Information Technology Act, 2000 (Amendment 2008). CERT-In operates 24x7 incident response Help Desk for providing timely response to reported cyber security incidents. CERT-In performs the following functions in the area of cyber security:
- Collection, analysis and dissemination of information on cyber incidents
 - Forecast and alerts of cyber security incidents
 - Emergency measures for handling cyber security incidents
 - Coordination of cyber incident response activities
 - Issue guidelines, advisories, vulnerability notes and whitepapers relating to information security practices, procedures, prevention, response and reporting of cyber incidents
 - Such other functions relating to cyber security as may be prescribed.
- c) CERT-In creates awareness on cyber security issues through dissemination of information on its websites (<https://www.cert-in.org.in> and <https://www.csk.gov.in>).

2.2 Establishment

CERT-In has been operational since January, 2004.

2.3 Constituency

The constituency of CERT-In is the Indian cyber community and Indian cyberspace. CERT-In provides services to the organizations in the Government, Public and Private sectors. In addition, CERT-In provides services to the individuals and home users also.

3. Activities & Operations

3.1 Scope and definitions

CERT-In provides:

- Proactive services such as Advisories, Security Alerts, Vulnerability Notes, sharing of technical information such as Indicators of Compromises (IoCs), Situational awareness of existing & potential cyber security threats and Security Guidelines for helping organizations to secure their systems and networks.
- Reactive services when security incidents occur so as to minimize damage.
- Security Quality management services in the form of cyber security audits, promotion of best practices and cyber security exercises/drills.

3.2 Incident handling reports

The summary of activities carried out by CERT-In during the year 2024 is given in the following table:

Activities	Incidents in 2024
Security Incidents handled	2041360
Vulnerability Notes Published	360
Advisories Published	72
Security Alerts issued	959
Security Drills	21
Trainings Organized	23

Table 1: CERT-In Activities during year 2024

3.3 Abuse statistics

In the year 2024, CERT-In handled 2041360 incidents. The types of incidents handled were Website intrusion & Malware propagation, Malicious Code, Phishing, Distributed Denial of Service (DDoS) attacks, Website Defacements, Unauthorized Network Scanning/Probing activities, Ransomware attacks, Data Breaches/Leaks and Vulnerable Services.

The summary of various types of incidents handled is given below:

Security Incidents	2024
Phishing	785
Unauthorized Network Scanning /Probing	1610608

Vulnerable Services	294908
Virus/ Malicious Code	119763
Website Defacements	5496
Website Intrusion & Malware Propagation	1246
Others	8554
Total	2041360

Table 2: Breakup of Security Incidents handled

3.4 Botnet Cleaning Initiatives

Botnet Cleaning and Malware Analysis Centre (Cyber Swachhta Kendra – CSK) has been established by CERT-In for detection of compromised digital devices in India and to notify, enable cleaning and securing systems of end users to prevent further malware infections. The Centre is working in close coordination and collaboration with Internet Service Providers (ISPs), Antivirus companies, Academia and Industry.

Currently, CSK is covering ~98% of the subscriber base for notifications about botnet/malware infection. CSK also provides services for organizations from various sectors including Communications (Internet Service Providers), Finance, Healthcare, Transport, IT & ITeS, Government, Academia, ‘Industries & Manufacturing’, Energy, Commerce, Infrastructure, ‘Information and Broadcasting’ and Smart Cities are collaborating and being benefited by using CSK services.

CSK celebrated awareness campaign ‘Cyber Swacchhta Pakhwada’ from 01-15

February 2024 in coordination with Internet Service Providers (ISP) and Antivirus Companies for spreading awareness and information regarding cyber security threats, challenges and safeguarding citizens against them. Over 3.18 Lakhs of Downloads were observed during the month of February 2024.

CSK has showcased the team's activities and accomplishments to a wide array of distinguished guests, including CISOs, dignitaries, and other technical and non-technical persons from various ministries/departments during the entire year.

CSK provides three Free Bot Removal Tools (FBRTs) developed in collaboration with “QuickHeal”, “K7” and “eScan” with a cumulative of 69.83 lakh downloads recorded till December 2024. These FBRTs are available for Microsoft Windows and Google Android platforms. CSK also provide Mobile Security Application ‘M-Kavach 2’ for Android platform to users via web portal.

3.5 Security Profiling, Assurance framework and Audit Services

Under Security Assurance Framework, Indian Computer Emergency Response Team (CERT-In) has created a panel of ‘IT security auditing organizations’ for carrying out information security auditing, including vulnerability assessment and penetration testing of computer systems, networks & applications of various organizations of the Government, critical infrastructure organizations and those in other sectors of Indian economy.

By the end of 2024, CERT-In has empaneled 160 Information Security Auditing organizations, on the basis of stringent qualifying criteria, to carry out information security audit, including the vulnerability assessment and penetration testing of the networked infrastructure of government and critical sector organizations. This list of CERT-In empanelled information security auditing organizations is being

consulted frequently by the entities in Government and critical sectors for their information security auditing requirements.

CERT-In has implemented data science platform for conducting periodic data analysis on audit findings from across country. The project enabled identification of areas for policy interventions. CERT-In has published Guidelines for Secure Application Design, Development, Implementation & Operations.

Government and critical sector organizations are implementing the security best practices in accordance with ISO 27001 standard and as per the advice issued by CERT-In. Implementation enabling workshops/interactions are conducted periodically. Services of CERT-In empaneled technical IT security auditors are being used for technical as well as compliance audits. CERT-In has also carried out episodic security audits of key organizations for enhancing their security posture.

3.6 Cyber threat Intelligence Sharing

A core part of CERT-In's mission as the first responder with respect to Incident Response and Security Teams is to provide a trusted community platform for sharing cyber threat intelligence and situational awareness. CERT-In releases Indicators of Compromises (IoC's) covering operational, tactical and strategic, alerts, advisories & vulnerability notes to update the Government and critical sector organizations about the existing and potential threats and suitable necessary actions to counter those threats.

CERT-In has operationalised its own Threat Intelligence eXchange platform based on STIX and TAXII standards. This automated platform facilitates bidirectional sharing of operational, strategic, enriched tactical threat intelligence to various counterparts and stakeholders in near real time in automatic fashion, thus helping to build a cyber-resilient ecosystem in the Indian cyber space.

The platform collects, correlates, enriches, contextualizes, analyses, integrates and pushes to the partners in near real time with Traffic Light Protocol (TLP) tags. The shared data can be consumed by the recipients into their automated workflows. This will help to streamline their threat detection, management, analysis and defensive process.

During the year 2024, CERT-In via its email mechanism and with its automatic threat Intel sharing platform- shared 954 Threat Intelligence alerts with the constituency. Chief Information Security Officers (CISOs) of various organizations are getting benefitted by the curated operational and tactical threat intelligence digest shared through an automated platform as well as email covering latest cyber threats targeting Indian Cyber space and enabling proactive mitigation actions.

3.7 National Cyber Coordination Centre (NCCC)

Continuously evolving cyber threat landscape and its impact on well-being of information technology, National Economy, and Cyber Security necessitates the need for near-real time situational awareness and rapid response to cyber security incidents. Government has set up the National Cyber Coordination Centre (NCCC) to generate macroscopic views of the cyber security threats in the country. The centre scans the cyberspace in the country at meta-data level and generates near real time situational awareness. The centre is facilitating various organizations and entities in the country to mitigate cyber-attacks and cyber incidents on a near real time basis.

3.8 Cyber Forensics

Cyber Forensics Lab of CERT-In is equipped with the equipment and tools to carry out data retrieval, processing and analysis of the raw data extracted from the digital data storage and mobile devices using sound digital forensic techniques. The primary task of the Lab is to assist the Incident Response (IR) team of CERT-In on occurrence of a cyber-incident and extend digital forensic support to carry out further investigation. In addition, Cyber Forensics Lab is being utilized in investigation of the cases of cyber security incidents and cyber-crimes, submitted by central and state government ministries / departments, public sector organisations, law enforcement agencies, etc. The Cyber Forensics Lab of CERT-In has been notified as Examiner of Electronic Evidence in exercise of the powers conferred by section 79A of the information Technology Act, 2000.

3.9 CVE Numbering Authority (CNA)

CERT-In has been undertaking responsible vulnerability disclosure and coordination for vulnerabilities reported to CERT-In since its inception. To move a step further in the direction to strengthen trust in “Make in India” as well as to nurture responsible vulnerability research in the country, CERT-In has now partnered with the CVE Program, MITRE Corporation, USA. In this regard, Indian Computer Emergency Response Team (CERT-In) has been authorized by the CVE Program, as a CVE Numbering Authority (CNA) for vulnerabilities impacting all products designed, developed and manufactured in India.

CVE is an international, community-based effort and relies on the community to discover vulnerabilities. The vulnerabilities are discovered then assigned and published to the CVE List by organizations from around the world that have partnered with the CVE Program. Partners publish CVE Records to communicate consistent descriptions of vulnerabilities. Information technology and cybersecurity professionals use CVE Records to ensure they are discussing the same issue, and to coordinate their efforts to prioritize and address the vulnerabilities.

CNAs are organizations responsible for the regular assignment of CVE IDs to vulnerabilities, and for creating and publishing information about the Vulnerability in the associated CVE Record. The CVE List is built by CVE Numbering Authorities (CNAs). Every CVE Record added to the list is assigned by a CNA. The CVE Records published in the catalogue enable program stakeholders to rapidly discover and correlate vulnerability information used to protect systems against attacks. In an effort towards responsible vulnerability disclosure and coordination process, CERT-In as a CNA has assigned and published a total of 77 CVE IDs during the year 2024.

CERT-In is also a member of APCERT Coordinated Vulnerability Disclosure (CVD) Working Group which is created with the aim to strengthen collaboration among APCERT members and facilitate information and knowledge sharing, enhance CVD cooperation, and promote the efficient adoption of CVD processes in the Asia-Pacific region.

3.10 State/Sectorial CSIRT

Under Sub-section (IV), clause (e) of the National Cyber Security Policy, 2013 proposed to create mechanisms for Security threat early warning, vulnerability management and response to security threats, CERT-In functions as the umbrella organization in enabling creation and operationalization of Sectoral and State Computer Security Incident Response Teams (CSIRTs) as well as facilitating communication and coordination actions in dealing with cyber crisis situations. CERT-In is issuing the necessary guidelines for setting up of sectoral CSIRTs and state CSIRTs.

3.10.1 State CSIRTs

CERT-In has shared the template/guidelines framework for setting-up of State Computer Security Incident Response Team (CSIRT) with all 28 States and 8 UTs. CERT-In is holding interactions with State Government IT departments for enabling and providing guidance on setting-up and operationalising the State CSIRTs. West Bengal State CSIRT is operational from 8th July 2019 and notified through Gazette notification at State level.

3.10.2 Sectoral CSIRTs

3.10.2.1 CSIRT-Fin

CSIRT-Fin under CERT-In is operationalized since 15 May 2020. CSIRT-Fin has been assigned the responsibility for coordinating and supporting the response to a computer security event or incident within the financial sector constituency. CSIRT-Fin is the incident response force which focuses on mitigation processes, providing on-site awareness, expertise, and recovery oversight.

3.10.2.2 CSIRT-Power

CSIRT-Power facility has been operationalised and notified on 23 September 2024 to serve as the responsible agency for responding to and preventing cybersecurity incidents within the power sector in coordination with CERT-In. It is setup at the Central Electricity Authority (CEA) under the administrative control of Ministry of Power (MoP). CERT-In is providing the requisite leadership for the CSIRT-Power to coordinate all the incident and other cyber security activities in Power sector. CERT-In is sending out fortnightly report on vulnerable services and botnet infections through its Cyber Swachhta Kendra (Botnet Cleaning and Malware Analysis Centre) to sectoral CSIRTs, Ministry of Power and other stakeholders in Power sector.

4. Events organized / hosted

4.1 Training

In order to create security awareness within the Government, Public and Critical Sector organizations, CERT-In regularly conducts trainings / workshops to train officials of Government, critical sector, public sector, industry, financial & banking sector on various contemporary and focused topics of Cyber Security.

In 2024, CERT-In has conducted 23 trainings on various specialized topics of cyber security. A total of 12,014 participants including system/Network Administrators, Database Administrators, Application developers, IT Managers, Chief Information Security Officers (CISOs)/ Chief information officers (CIOs), and IT Security professional have been trained. The list of training/workshop programs conducted in 2024 is given below:

S.No.	Program Title	Dates	Duration
-------	---------------	-------	----------

1	Training program on "Incident Response & Management"	29-01-2024	1-Days
2	Training program on "Industrial Control Systems (ICS) Security"	28-02-2024	1-Day
3	Training Program on "Latest Cyber Security Trends, Attacks and Countermeasures" for SMEs and Private sector organizations	28-03-2024	1-Day
4	Training program on "Network Security Threats and Countermeasures"	19-04-2024	1-Day
5	Training program on "Security Operation Center (SOC) Management"	30-04-2024	1-Day
6	Training program on "Malware Attacks and Countermeasures"	17-05-2024	1-Day
7	Training program on "Application Security"	05-06-2024	1-Day
8	Training program on "Cloud Security"	14-06-2024	1-Day
9	CERT-In and C-DAC, Hyderabad Joint Training Program on " ICS/OT Security"	18 to 21-06-2024	4-Day
10	Training program on "Ransomware Attacks and Countermeasures"	10-07-2024	1-Day
11	Training program on "Implementing information security practices"	23-07-2024	1-Day
12	Training program on "Cyber Security Preparedness for Health Sector"	26-07-2024	1-Day
13	Training program on "Mobile App and Digital Payments Security"	06-08-2024	4-Day
14	Training program on "Cloud vulnerabilities and it's remediations"	10-09-2024	1-Day
15	Training program on "Supply Chain security risks and Best Practices"	19-09-2024	1-Day
16	Training program on "Malware Threats, Attacks and Countermeasures"	08-10-2024	1-Day
17	Training program on "AI-powered Cybersecurity threats & countermeasures"	22-10-2024	1-Day
18	Training program on "Log Analysis Techniques and Management"	29-10-2024	1-Day
19	CERT-In and C-DAC, Hyderabad joint tranining program on " Cyber Security (Level 1) for BFSI Sector"	23-10-2024 26-10-2024	4-Day

20	CERT-In and C-DAC, Hyderabad joint training program on "Telecom Security (Level 2)"	21 to 24-10-2024	4-Day
21	Training program on "Cyber Security attacks & Countermeasures"	19-11-2024	1-Days
22	Training program on "Secure Coding Practices"	03-12-2024	1-Day
23	Workshop on implementation of "Cyber Crisis Management Plan (CCMP)"	20-12-2024	1-Day

As part of services of CERT-In, for creation of awareness in the area of cyber security as well as training / upgrading the technical knowhow of various stakeholders, CERT-In observed the National Cyber Security Awareness Month (NCSAM) during October 2024 by organizing various events and activities for citizens as well as the technical cyber community in India with a theme of “SatarkNagrik, Secure our World”. CERT-In conducted several awareness activities such as Quiz, webinars, Capture the Flag event in collaboration with ISEA, C-DAC, Noida and other industrial partners. Total outreach during the NCSAM 2024 is 2,91,51,000+.

CERT-In also observes “Safer Internet Day” on 1st Tuesday of February Month every year, Swachhta Pakhwada from 1 to 15 February of every year and Cyber JagrooktaDiwas (CJD) on 1st Wednesday of every month for sensitizing internet users on cyber frauds, crimes and safety measures. In 2024, CERT-In conducted 95 awareness sessions covering 23,724 participants.

4.2 Drills & exercises

Cyber security exercises are being conducted by CERT-In to help the organizations to assess their preparedness to withstand cyber-attacks. These exercises have helped tremendously in improving the cyber security posture of the information infrastructure and training of manpower to handle cyber incidents, besides increasing the cyber security awareness among the key sector organizations. CERT-In has conducted 18 such cyber security exercises in 2024.

Till 2024, CERT-In has conducted 108 Cyber security exercises of different complexities, including table top exercises, with participation from around 1435 organizations covering various sectors of Indian economy from Government/Public/Private including Defense, Paramilitary forces, Space, Energy, Telecommunications(ISPs), Finance, Health, Oil & Natural Gas, Transportation (Railways & Civil Aviation), IT/ ITeS/ BPO sectors and State Data Centers.

5. International Collaboration

5.1 International partnerships and agreements

Strengthening International cooperation to effectively deal with cyber security issues has been one of the main focus areas of the Government. As such, this aspect is being dealt with by way of security cooperation arrangements in the form of Memorandum of Understandings (MoUs) between Indian Computer Emergency Response Team and its overseas counterpart agencies that are willing to work together and share information in a timely manner for preventing cyber incidents and cyber-attacks as well as collaborating for providing swift response to such incidents.

CERT-In is regularly coordinating with leading service providers and product vendors within and outside the country to obtain advance information on latest

cyber threats and attack trends and devise appropriate proactive and preventive measures.

CERT-In is an operational member of Asia Pacific Computer Emergency Response Teams (APCERT). CERT-In is the convener of “IoT Security working group” across APCERT to address security threats and evolve best practices to secure IoT devices.

CERT-In is also member of various other working groups under APCERT such as Information sharing working group, Drill working group, Malware Mitigation working group, Tsubame working group and Training Working Group.

CERT-In is a member of global Forum of Incident Response and Security Teams (FIRST). The membership in FIRST enables incident response teams to more effectively respond to security incidents in a reactive as well as proactive manner. CERT-In is also an Accredited Member of Task Force for Computer Security Incident Response Teams / Trusted Introducer (TF-CSIRT/TI).

5.2 Capacity building

5.2.1 Training

- a) CERT-In participated in the JP-US-EU Industrial Control Systems Cybersecurity Week for Indo-Pacific Region in Tokyo, Japan during 12- 15 November 2024.
- b) CERT-In participated in the 2024 APISC Security Training Course hosted by KrCERT/CC during 23-27 September 2024 at Seoul, Korea.
- c) CERT-In participated in the APCERT online training on “Incident Handling” on 30th January 2024.
- d) CERT-In participated in the APCERT online training on “Detecting malicious activities of APT groups in the organization's infrastructure through proactive threat hunting” on 26th March 2024.

- e) CERT-In participated in the APCERT online training on “Cyber Security Incident Response - the regulation, statistics, and experience among TW government and CI” on 28th May 2024.
- f) CERT-In officials also participated in the training program on Industrial Control Systems (ICS) cybersecurity (301L) in Idaho Falls, Idaho, USA organized by Cybersecurity and Infrastructure Security Agency (CISA), USA during 12-15 February 2024.
- g) CERT-In officials also participated in the training program on Industrial Control Systems (ICS) cybersecurity (401L) in Idaho Falls, Idaho, USA organized by Cybersecurity and Infrastructure Security Agency (CISA), USA during 23 -25 April 2024
- h) CERT-In participated in the APCERT online training on “Introduction to Threat Intelligence Tools - OpenCTI introduction” on 16th July 2024.
- i) CERT-In participated in the APCERT online training on “Incidents Handling and Ticketing” on 27th September 2024.
- j) CERT-In participated in the APCERT online training on “Experience sharing on Social Media Incident Handling by Bhutan Computer Incident Response Team” on 02nd December 2024.

5.2.2 International Drills & exercises

CERT-In has contributed in 2 international exercise planning & scenario development and participated as player in 3 International cyber security drills in 2024. Following are the brief of the exercises:

- (i) CERT-In contributed and participated in the APCERT Annual Cyber Drill 2024 held on 29th August 2024. The objective of the drill is to test the response capability of leading Computer Security Incident Response Teams (CSIRT) within the Asia Pacific economies.

- (ii) CERT-In contributed & participated in the first BRICS Cyber Drill held in Kazan, Russia from 16th to 19th September 2024. The theme of the drill was “Attacks on Suppliers (SupChain)”. The primary agenda of the drill was to enhance communication and coordination.
- (iii) CERT-In participated in the ACID Drill & TTX on 15th & 16th October 2024. The theme of the drill was “Navigating the Rise of AI-Enabled Cyber Attacks”. The primary objective of this drill was to test incident response processes, best practices to identify areas for further improvement and enhance operations planning capabilities.
- (iv) CERT-In participated in the 4th edition of AFRICA CERT Cyber Drill on 29th November 2024. The theme of the drill was “Enhance Your Readiness (Technical Exercise)” The drill included various threat simulations, including ransomware attacks, reverse engineering of malware, and strategic scenarios tailored to represent current cyber risks.

5.3 Other international activities

- a) CERT-In participated and presented in the CVE/FIRST VulnCon 2024 & Annual CNA Summit during 25-27 March 2024 in Raleigh, USA.
- b) CERT-In officials attended the Forum of Incident Response and Security Teams (FIRST) Annual General Meeting (AGM) 2024 & 36th Annual FIRST Conference held during 10-14 June 2024 at Fukuoka, Japan.
- c) CERT-In participated in the seventh Substantive Session meeting of the UN Open-Ended Working Group (OEWG) on Security of and in the Use of Information and Communications technologies (ICTs) at UN HQ New York, USA during 4-8 March 2024.
- d) CERT-In participated and presented in the World Economic Forum Annual Meeting on Cybersecurity 2024 held during 11-13 November 2024 in Geneva,

Switzerland.

- e) CERT-In participated and presented in the Singapore International Cyber Week (SICW) 2024 held during 14-17 October 2024 at Singapore
- f) CERT-In participated in the 72nd Task Force for Computer Security Incident Response Teams (TF-CSIRT) Meeting during 25-27 September 2024 in Prague, Czech Republic.
